AVVERTENZE

Le informazioni e i dati contenuti nel presente catalogo sono puramente indicativi, in quanto le condizioni d'impiego dei prodotti hanno luogo al di fuori del nostro controllo. Il produttore si riserva il diritto di apportare in ogni momento le modifiche che riterrà necessarie.

È vietata la riproduzione totale o parziale del presente catalogo senza l'autorizzazione scritta di Comec Italia srl.

ADVERTENCIAS

Las informaciones y datos contenidos en el presente catálogo son puramente indicativos, ya que las condiciones de uso de los productos están fuera de nuestro control. El productor se reserva el derecho de aportar, en cualquier momento las modificaciones que considere necesarias. Se prohíbe la reproducción total o parcial del presente catálogo sin previa autorización escrita de Comec Italia srl.

WARNING

The information contained in this data sheet should not be taken as binding, since the employment conditions of the products are out of our control.

The features indicated in this catalogue may be changed without notice.

The reproduction of this data sheet in any form is forbidden without the written authorization of COMEC Italia srl.

AVERTISSEMENTS

Les informations et les données contenues dans le présent catalogue sont purement indicatives étant donné que les conditions d'emploi sont hors de notre contrôle.

Le producteur se réserve le droit d'apporter à tout moment les modifications qu'il considérera nécessaires.

La reproduction totale ou partielle du présent catalogue, sans l'autorisation écrite de Comec Italia srl, est interdite.

INTRODUZIONE

Il tampone è il componente più importante nel processo di stampa tampografico, per cui la corretta scelta è fondamentale onde ottenere ottimi e costanti risultati finali di stampa e una lunga vita operativa del tampone stesso. COMEC Italia srl ha realizzato il presente catalogo rappresentando le più significative tipologie di tampone con l'obiettivo di facilitarne la scelta da parte del cliente. Per specifiche esigenze, si realizzano tamponi su misura e tamponi con silicone antistatico (RED-ONE).

CARATTERISTICHE E SCELTA DEL TAMPONE

Il tampone è realizzato con speciali gomme siliconiche dalle seguenti caratteristiche:

- Ottima presa e rilascio dell'inchiostro; *trasposizione perfetta dell'immagine da stampare.*
- Resistenza alla lacerazione, a solventi e inchiostri; *lunga durata del tampone.*
- Stabilità di forma e durezza; *riutilizzazione per più volte.*
- Predisposizione alla pulizia; *rapida manutenzione.*

La scelta del tampone dipende da molti fattori, fra i quali i principali sono:

- 1 Forma della superficie dove stampare; *piana o curva.*
- 2 Dimensione della superficie di stampa; *area di stampa.*
- 3 Tipo di superficie dove stampare; *liscio, ruvido, ecc...*
- 4 Numero dei colori da stampare.

Questi fattori determinano la durezza del tampone, espressa in Shore (vedere Tab. A e Tab. B) e la sua forma.

Importante:

Per superfici rugose è consigliato l'uso di tamponi duri di durezza 12-16 Shore (Bleu-Rosso).

La dimensione del tampone è determinata dalla superficie di stampa.

È necessario utilizzare tamponi le cui dimensioni siano superiori almeno del 20% rispetto all'area di stampa.

Le quotature dei tamponi indicate nel presente catalogo sono riferite alla massima possibilità di stampa.

INTRODUCTION

The pad is the most important element in the pad printing process whose correct choice is essential to obtain good final printing results as well as a long working life of the pad. COMEC Italia srl has issued this catalogue to show the most relevant types of pads in order to make the customer's choice easier.

Custom-pads are supplied on request, as well as antistatic silicone pads (RED-ONE).

CHARACTERISTICS AND PAD CHOICE

The pad is made with special silicone rubber with the following characteristics:

- excellent absorption and detachment of the ink; perfect transposal of the image to be printed
- tear strength and resistance to solvents and inks; pad long life
- hardness and form stability; possibility of being used several times
- easy to be cleaned; quick maintenance.

The choice of the pad depends on many elements, i.e.:

- 1 Shape of the printing surface: flat or uneven
- 2 Dimension of the printing surface: printing area
- 3 Type of printing surface: smooth, rough, etc.
- 4 Number of the colours to be printed.

These elements determine the pad hardness expressed in Shore (see table A and B) and its shape.

Important:

For rough surfaces it is recommended to use hard pads of 12-16 Shore hardness (Blue-Red).

The size of the pad depends on the printing surface.

It is necessary to use pads whose dimensions are at least 20% greater than the printing area.

The data of the pads listed in this catalogue refer to the max. printing possibility.

INTRODUCCIÓN

El tampón es el componente más importante en el proceso de impresión tampográfica, por lo que la correcta elección es fundamental para obtener excelentes y constantes resultados finales de impresión y una larga vida operativa del tampón mismo. La COMEC Italia srl ha realizado el presente catálogo representando los más significativos tipos de tampón con el objetivo de facilitar su elección por parte del cliente. Para específicas exigencias, se realizan tampones a medida y de silicona con antiestático (RED-ONE).

CARACTERÍSTICAS Y ELECCIÓN DEL TAMPÓN

El tampón se fabrica con especiales gomas silicónicas que poseen las siguientes características:

- Excelente toma y liberación de la tinta la tinta; *transposición perfecta de la imagen a imprimir.*
- Resistencia al desgarró, los solventes y tintas; *larga duración del tampón.*
- Estabilidad de la forma y dureza; *reutilización en varias veces.*
- Predisposición para la limpieza; *rápido mantenimiento.*

La elección del tampón depende de muchos factores, entre ellos, los principales son:

- 1 Forma de la superficie a imprimir; *plana o curva.*
- 2 Dimensiones de la superficie de impresión; *área de impresión.*
- 3 Tipo de superficie a imprimir; *lisa, áspera, etc.*
- 4 Número de los colores a imprimir.

Estos factores determinan la dureza del tampón, expresada en Shore (véase Tab. A y Tab. B) y su forma.

Importante:

Para superficies ásperas se aconseja el uso de tampones duros, con dureza 12-16 Shore (Azul-Rojo).

Las dimensiones del tampón es determinada por la superficie de impresión. Es necesario utilizar tampones cuyas dimensiones sean superiores al menos un 20% con respecto al área de impresión.

Las medidas de los tampones indicados en el presente catálogo se refieren a la máxima posibilidad de impresión.

INTRODUCTION

Le tampon est le composant le plus important dans le processus d'impression tampographique, son choix est donc fondamental pour obtenir des résultats finaux d'impression excellents et une longue durée opérationnelle.

COMEC Italia srl a réalisé le présent catalogue en représentant les types de tampon les plus significatifs avec l'objectif de faciliter le choix de la part du client.

Pour des exigences spécifiques, nous réalisons des tampons sur mesure et avec silicone antistatique (RED-ONE).

CARAXTÉRISTIQUES ET CHOIX DU TAMPON

Le tampon est réalisé avec des caoutchoucs silicone spéciaux aux caractéristiques suivantes:

- Excellente prise et émission de l'encre; *transposition parfaite de l'image à imprimer.*
- Résistance à la déchirure, aux solvants et aux encres; *longue durée du tampon.*
- Stabilité de forme et de dureté; *réutilisation plusieurs fois.*
- Predisposition au nettoyage; *entretien rapide.*

Le choix du tampon dépend de plusieurs facteurs, dont les principaux sont:

- 1 Forme de la surface où imprimer; *plate ou courbe.*
- 2 Dimension de la surface d'impression; *zone d'impression.*
- 3 Type de surface à imprimer; *lisse, rugueux, etc...*
- 4 Nombre de couleurs à imprimer.

Ces facteurs déterminent la dureté du tampon, exprimée en Shore (voir Tab.A et Tab.B) et sa forme.

Important:

Pour les surfaces rugueuses il est conseillé d'utiliser des tampons d'une dureté 12-16 Shore (Bleu-Rouge).

La dimension du tampon est déterminée par la surface d'impression. Il est nécessaire d'utiliser des tampons dont les dimensions sont supérieures de 20% à la zone d'impression.

Les dimensions de tampons indiquées dans ce catalogue se réfèrent à la possibilité maximale d'impression.
