Nafitec™

Cos'è la nanotecnologia NAFITEC™?

La nanotecnologia **NAFITEC™** di NBC applicata alle zanzariere in PET crea la serie **AMIDOLOGY™**, composta da **AMIDOLOGY™** Maintained Cleanliness e **AMIDOLOGY™** No Insect Intrusion.

La nanotecnologia **NAFITEC™** conferisce a queste zanzariere caratteristiche funzionali speciali, creando una superficie antipolvere e garantendo di conseguenza una ventilazione adeguata nel tempo, anche con maglie di più piccole dimensioni per bloccare ogni tipologia di insetto.

Utile per zanzariere poste su lucernari o finestre difficili da raggiungere, **NAFITEC™** consente di mantenere una pulizia più rapida, ottimale e duratura in qualsiasi ambito di applicazione, tra i quali: domestico, industriale, alimentare, pubblico, sanitario, ecc.

Mechanism model	Effects	
	Nafitec™	Untreated
Anti-dust (Nafitec™ basic function) Powder Exhibited by minimizing contact points between nanoparticles and powder.	 2 mg / 100 cm ²	 30 mg / 100 cm ²
