Innovative Value, Outstanding Excellence

ATMA deeply cultivated in Research and Development for screen printing technology over 30 years, granted innovative leadership in the industry with excellent reputation and continuous appraisal. Acquired countless domestic and overseas awards for product design, achieved more than 100 patents in Taiwan and overseas from entry-level Manual Screen Printing Table to upscale Opto-electric Fully Automatic Screen Printer. Further research to develop Solar Cell Screen Printer, always leading to the extreme research and development of screen printing, conducts the trend of technology to serve as a role model of learning in the industry. Wide range of products, screen printing is linked up with our daily life, applied in the Communication, Computer products, Opto-electronics technology, Solar Energy, etc. and other diverse of professional areas.

▲ Future ATMA Headquarter

[Vision]

Professional Innovation
Aiming to achieve benchmark enterprise of foremost global screen printing technology

[Mission]

- Leading printing technology to create the trend of fully automatic, least-man, unmanned production.
- People-oriented is the core value, providing a learning environment to partners attaining self-value
- Thorough development in Taiwan, global operations, sustainable management toward to harmony and happiness enterprise

[Awards]

- Achieved Patent of Invention from USA, Taiwan, China, UK, and more than 100 of new patent from many different countries
- Awarded "Taiwan Excellence" continuously for years, accumulated more than 80 different models

[Company Profile]

Founded: 25th July, 1979
President: Mr. T.C. Chen
Capital: USD 6.9 Million
Factory Area: 15,000 m²
Employee: 400
Certifications: ISO 9001, ISO 14001, CE

[MANAGEMENT PHILOSOPHY]

SINCERITY
Treating people with sincerity

TRUST
Running business with trust

DILIGENCE
Practicing work with diligence

HARMONY
Handling matters with harmony

Trust!

Applied screen printing into living, creates unlimited possibility

Applications on Flat Display

Suitable for Cover Lens, Cover Glass, Touch Panel, ITO film, OGS Panel, LGP Panel, EL Plate, LCD TV Anti-reflection Tempered Glass, Biotech film, etc. high-tech industrial printing process.

AT-25PA / AT-45PA

Digital Electric Flat Screen Printer

Suitable for semi-automatic screen printing on small size glass, such as Tableware Glass, Decorative Glass, Lighting Decorative Glass etc.

- Motor driven transmission, energy efficiency, operated with small volume air source.
- Servo motor driven printing stroke, stable motion and precise positioning
- Facilitate to adjust squeegee angle / depth / leveling / printing pressure
- Digital control HMI, versatile function, easy operation
- Intensive protection with adding safety bar, safety pressing plate, E-stop switch, error diagnosis

(Depth x Width)	AT-25PA	AT-45PA
Table size (mm)	250 x 400	400 x 600
Max printing area (mm)	200 x 250	300 x 450
Max frame O/D size (mm)	380 x 520	500 x 720
Substrate thickness (mm)	0 - 50	0 - 50
Productivity (non-stop full stroke full speed)	780 P/H	720 P/H
Power source	1 Φ, 220V,50/60Hz	
Power consumption (kW)	1.24	1.24
Air source pressure (kg/sqcm)	5 - 7	5 - 7
Air exhaustion (L/minute)	6.91	6.91
Machine dimension (mm, WxDxH)	810x700x1600	1000x770x1600
Machine weight (kg)	190	245

Manual Loading / Unloading

AT-25PAD (4I)

AT-45PAD (2I)

Digital Electric Index Flat Screen Printer

Suitable for fast printing on various types of small product, such as Cover Lens for smart phone, Electric Components, Ceramic Substrate, etc.

- Individual fixture with micro adjustment to facilitate quick alignment
- Servo motor driven printing stroke, stable motion and precise positioning
- Facilitate to adjust squeegee angle / depth / leveling / printing pressure
- Adopt Filter + Regulator unit to avoid contamination of oil mist emission
- Display error message on touch-screen to guide trouble shooting quickly

(Depth x Width)	AT-25PAD (4I)	AT-45PAD (2I)
Table size (mm)	140 x 250	200 x 400
Max printing area (mm)	140 x 250	200 x 400
Max frame O/D size (mm)	320 x 530	320 x 730
Substrate thickness (mm)	0 - 150	0 - 150

ATMAGP 20PPS

Single CCD Center Registering Screen Printer for Cover Lens

Specialized in automatic center registering for high precise printing on cover lens without fiducial mark, i-watch

- Customized table, grooves are made in according to substrate size and zero off-contact height printing, quick loading and positioning.
- 3 sets servo motor driven registration platform, use image identification to control table displacement volume, accuracy of visual registering system attains $\pm 5 \mu\text{m}$
- Equipped with single CCD camera to view full area registration, work distance attains 176.5 mm.
- Adjustable angle safety raster and E-stop switch are located in front of shuttle table

(Depth x Width)

ATMAGP 20PPS

Table size (mm)	350 x 400
Max printing area (mm)	115 x 165
Max frame O/D size (mm)	400 x 600
Substrate thickness (mm)	0.3 - 2.0
Productivity	550 P/H
(non-stop full stroke full speed)	
Power source	3 Φ , 220V/380V, 50/60Hz
Power consumption (kW)	2
Air source pressure (kg/sqcm)	5 - 7
Air exhaustion (L/minute)	29
Machine dimension	1050 x 1250 x 1780
(mm, WxDxH)	
Machine weight (kg)	410

ATMAGP 25PP

CCD Center Registering Screen Printer for Cover Lens

Specialized in automatic center registering for high precision printing cover lens without fiducial mark

- Screen up down fast and stable, registration accuracy is $\pm 0.05 \text{ mm}$
- 3 sets servo motor driven registration platform, identify image to control table displacement volume, accuracy of visual registering system attains $\pm 5 \mu\text{m}$
- Use silent vacuum to hold position, ensure the registered position does not displace upon sliding table movement or printing
- HMI digitalized control, 100 groups of memory module, versatile function
- Enclosed with auto error diagnosis system, E-stop switch, etc. for intensive protection

(Depth x Width)

ATMAGP 25PP

Table size (mm)	350 x 350
Max printing area (mm)	160 x 110
Max frame O/D size (mm)	350 x 500
Substrate thickness (mm)	0.3 - 2
Productivity	550 P/H
(non-stop full stroke full speed)	
Power source	3 Φ , 220V/380V, 50/60Hz
Power consumption (kW)	1.5
Air source pressure (kg/sqcm)	5 - 7
Air exhaustion (L/minute)	54
Machine dimension	1050 x 1250 x 1680
(mm, WxDxH)	
Machine weight (kg)	405

ATMATIC

45PAD/T

Fully Automatic Cover Lens Screen Printer (Tray Carrier)

Specialized in automatic screen printing on cover
lens for smart phone

- Manual loading on tray, mechanism automatic sending out the tray to process feeding, correcting, printing, unloading and reclaiming tray
- Index rotary processing synchronous printing, feeding and unloading to raise productivity
- Fastest printing productivity to achieve 900 pph
- Equipped with tacky roller to clean substrate
- Adding full protective shield to prevent dusts influence printing process to lower defective rate
- Enclosed E-stop switch at front / back side, full shield dust-proof, intensive safety protection

(Depth x Width)

ATMATIC 45PAD/T

Table size (mm)	200 x 400
Max printing area (mm)	150 x 200
Max frame O/D size (mm)	400 x 700
Substrate thickness (mm)	0.5 - 1.1
Productivity (non-stop full stroke full speed)	900 P/H
Power source	3Φ, 380V, 50/60Hz
Power consumption (kW)	3
Air source pressure (kg/sqcm)	5 - 7
Air exhaustion (L/minute)	31.4
Machine dimension (mm, WxDxH)	2050 x 1800 x 2070
Machine weight (kg)	1030

Cassette Loading/Unloading Belt Transit

ATMALINE

CL30 (D)

Fully Automatic Cover Lens Screen Printing Line

Specialized in automatic center registering high precision printing Black Matrix, IR, Icon, Logo, Glue Mask, etc. on cover lens without fiducial mark

- Adjustable cassette, divided into two zones to store 100 pcs, according to glass size can make self-adjustment, particular cassette material to resist weak acid-base and resistant temperature 180°C
- Fast dispatching from feeder, internal consisted of temporary stacker and cassette preparation area, sustained supply to cassette and uninterrupted providing material to printer fast and stable processing
- Printing head with two sections up down control, first section short stroke (printing purpose), second section long stroke (exchange squeegee /flood coater purpose)
- High productivity to achieve 2000 pph
- Screen frame alignment adopts two groups of 3 servo motor to control X/Y/θ visual registration system to achieve accuracy ± 3 μm
- Enclosed E-stop switch, screen cleaning button, safety raster, etc. for intensive protection

(Depth x Width) **ATMALINE CL30(D)**

Table size (mm)	550 x 630
Max printing area (mm)	150 x 210 (3.5" - 7")
Max frame O/D size (mm)	650 x 750
Substrate thickness (mm)	0.55 - 1.1
Productivity (non-stop full stroke full speed)	2000 P/H
Power source	3Φ, 220V/380V,50/60Hz
Power consumption (kW)	8
Air source pressure (kg/sqcm)	5 - 7

AT-60PD / AT-70PD

Digital Electric Flat Screen Printer

AT-80P

Electric Flat Screen Printer

Suitable for high precise screen printing on various flat film / slice / thin panel, such as Membrane Switch, Tablet Panel, Flexible Printed Circuits (FPC), Light Guided Panel (LGP), etc.

- PLC control, selectable six printing cycle mode to satisfy with diverse printing requirement
- Robust coupled frame holder design, strong structure suitable for high pressure printing
- Exchangeable English and Chinese language display, digitalized control, quick selection, setting and retrieve
- Display error message on touch-screen, explicit guidance quick trouble shooting
- Equipped with peel-off device to avoid mesh sticky while printing

Option

- Dripless Squeegee
- Registration Pin

ATMAGP 30PP

ATMAGP 50PP

CCD Center Registering Screen Printer for Tablet Panel

Suitable for center registering high precision printing on glass panel without fiducial mark

Vacuum Pad Transit

- Fast and stable screen up down, precise positioning ±0.05 mm
- Three sets servo motor driven registration platform, identify image to control table displacement volume, accuracy of visual registering system attains ± 5 μm
- Use silent vacuum to hold position, ensure the registered position does not displace upon sliding table movement or printing
- Particular material for vacuum cup to avoid vacuum trace and scratching, finish printing automatic unloading to save time and labor
- Enclosed automatic error diagnosis, E-stop switch, etc. for intensive protection

ATMALINE

CL50

Fully Automatic Tablet Panel Screen Printer

Specialized in automatic center registering for high precision printing Black Matrix, Silver Line, Photoresist, Front / Back side Glue Mask, IR, Icon, Logo onto tablet glass panel without fiducial mark

- Fully automatic screen printing production line design, whole line is consisted of cassette feeder, automatic tablet panel printer, AOI automatic optical inspection, diverter + inspection disqualified buffer, IR dryer, concourse + inspection disqualified buffer, cassette unloader.
- Whole line is covered by full shield dustproof, assure printing yield rate.
- Screen registration adopts 4 sets servo motor to control X/X/Y/Y four axis, use image visual system automatic control screen micro-adjustment, accuracy of registration system attains $\pm 3\mu\text{m}$
- Dual line synchronous processing, adding diverter, concourse to raise printing productivity
- AOI inspects mainly item : toothed pin hole, stain, printing deviation, etc.

(Depth x Width)	ATMALINE CL50

ATMAOE

56 / 67 / 710

Opto-electronic High Precision Screen Printer (G7)

Suitable for high precision printing on flat film / sheet / thin plate, such as Electro Luminescent, Light Guided Panel, Diffusor, Touch Panel, Flexible Printed Circuits, Biotech, ITO conductive glass, etc. (automatic take-off is suitable for thin filmsubstrate)

- Servo motor driven, strong printing torque, full stroke extreme stable motion
- Squeegee / flood coater with digital equalizing pressure control, assure printing uniform layer accuracy
- Servo driven synchronous peel-off, automatic calculating speed and peel-off height to avoid mesh sticky
- 100 groups of memory can be named and numbered individually, quick save and retrieve to facilitate different processing standardized management
- Four-post synchronous locking system ensures printing stability.

Option

- CCD auxiliary registering monitor system
- Up down conveyor device
- Dripless squeegee
- Cleaning roller
- Retractable pneumatic registration pin
- Anti-static eliminator

MF44 / MF66 (1)

Visual System Auto-alignment Screen Printer

Suitable for precise printing on small size of capacitive touch screen, ITO conductive glass, ITO conductive thin film, EL board etc.

▼ Anti-dust cover (option)

- More economic model for customers' various choice.
- Four-post model with pneumatic locking system to assure parallelism between printing stroke and table.
- Printing table is made by thick alloyed aluminum plate with high precision tooling process and HAZ treatment for scratch on substrate.
- Adopted advanced PLC to collaborate with each transmission/control system, I/O points are reserved for connection with upstream and downstream equipments.
- Equipped diagnose circuit, auto restoration, E-stop button and, alarm light etc. for comprehensive protections.

Option

- Dripless squeegee
- Auto ascent registration pin
- Anti-dust cover
- Cleaning roller device

Visual System Auto-alignment Screen Printer

Suitable for precise printing on capacitive touch screen, ITO conductive glass, ITO conductive thin film, EL board etc.

▼ Anti-dust cover (option)

- Adopted digital constant pressure control system for squeegee/flood coater, individual pressure is controllable from HMI.
- Screen up/down structure is supported by four posts with dual chain for synchronous drive via German made motor. Adopted high resolution encoder to control screen height digitally, positioning accuracy achieve $\pm 0.05\text{mm}$.
- Auto-aligned table is driven by 3 servo motors, and micro-adjusted according to calculation of vision system, repeatability accuracy achieves $\pm 5\mu\text{m}$.
- Adopted advanced PLC and controller for each transmission / control system. Reserved I/O points for connection with upstream/downstream equipment.
- Equipped diagnose circuit, auto restoration, safety light curtain, E-stop button and, alarm light for comprehensive protections.

Option

- Dripless squeegee
- Static eliminator
- Cleaning roller device
- Anti-dust cover
- FFU (Fan-Filter Unit)

FL66

Touch Panel Ultra Fine Line Screen Printer

Specialized in precise printing ultra fine line on ITO
glass or film

- Equipped with automatic squeegee leveling calibration and linear displacement sensor, assure bilateral depth of squeegee consistence.
- High level table top accuracy to attain ± 0.05 mm
- Servo motor driven transmission, strong printing torque, full stroke stable motion
- Three sets of servo motor control registration, use visual system to control table movement volume, accuracy of visual registering system attains $\pm 5 \mu\text{m}$
- Enclose automatic error diagnosis, safety restoration, safety raster, E-stop switch, warning lamp, etc, for intensive protection

ATMATIC

MF6565

Touch Panel Ultra Fine Line Screen Printer

Suitable for printing Touch-screen Film, Blood testers, Flexible Printed Circuits, Electro Luminescent panels, and etc.

- In-line design: vacuum pads + wheels to receive substrate -> CCD registration -> sliding table transportation -> screen printing -> vacuum pads + wheels to discharge substrate.
- Auto-aligned table is driven by 3 servo motors, and micro-adjusted according to calculation of vision system, repeatability accuracy achieve $\pm 5 \mu\text{m}$.
- Adopted advanced PLC and controller with high compatibility, and east to expand and maintain.
- With Shifted Printing Function, 2 steps of printing pressure control. Initially squeegee prints by slight pressure, then turns to preset printing pressure to reduce squeegee scratches on screen.
- Equipped diagnose circuit, auto restoration, safety light curtain, E-stop button and, alarm light for comprehensive protections.

Option

- Dripless squeegee
- Cleaning roller device
- FFU (Fan-Filter Unit)
- Static eliminator
- Anti-dust cover

MF6565/H

Fully Automatic CCD Registration Screen Printer (Fork-type)

Suitable for high precision printing process such as B/M, IR, icon, logo etc. on ITO conductive glass of capacitive touch screen panel.

▼ Anti-dust cover (option)

- UPE wheel + FKM O-ring on feeding/discharging device to prevent scratches on substrate. Achieves a unmanned transportation production line.
- Auto-aligned table is driven by 3 servo motors, and micro-adjusted according to calculation of vision system, repeatability accuracy achieves $\pm 5 \mu\text{m}$.
- Servo-synchronized screen peel-off function to prevent substrate sticks under screen; speed is auto computed and collaborates with printing speed. Height and start point can be preset digitally.
- Pneumatic locked 4 posts during printing to assure parallelism between printing stroke and table.
- 100 sets of parameter combination can be named, numbered and accessed. Easy for digital management of printing process.

Shuttle Table Transit

Fully Automatic Touch Panel Glass Screen Printer

Suitable for high precision screen printing on ITO
conductive glass, PMMA optical acrylic, etc

- Servo motor + tooth belt driven reciprocation shuttle table transmission, quick and stable transportation
- Glass transportation with vacuum to prevent displacement while movement
- Screen with three point X/Y/ θ micro adjustment, precise and smooth double frame design, enclose position indicator, original coordinate indicator
- Enclosed roller conveyor outlet, transfer the incoming substrate to dryer
- When control system malfunction, error message displays onto touch panel for quick trouble shooting

Option

- Anti-dust cover
- Static eliminator

ATMATIC

IG56/C ^{G3} / IG68/C ^{G3.5}

810/C ^{G4.5}

Fully Automatic CCD Registering Opto-electronic Glass Screen Printer

Suitable for fully automatic production CCD image / high precision screen printing process, such as silver line, protective glue mask, anti-etching ink, etching paste, automotive digital dashboard, etc.

▼ Anti-dust cover (option)

● **Innovative Design :**

- Up down synchronous corresponding CCD registering system, upper fiducial registering screen, lower compensated registering for substrate to raise printing accuracy and convenient operation.
- Rapid in / outlet fork carrier transportation to raise productivity, ensure substrate without scratching and suction traceless.
- Adjustable conveyor roller width and pre-registration device, adapt diverse substrate with various size.

● **Solid Precision :**

- Elaborate design, solid structure light weight non-distortion, fast motion, steady silence and flexibility.
- Top class servo motor control, fast printing, precise alignment, substantial increasing yield rate.

● **Fast Setting :**

- Digitalized operational function parameter setting + 100 groups memory production condition, substantial decreasing set up time.
- Automatic screen calibrating function, immediate printing after installing the screen, substantial decreasing preparation for printing.

● **Convenient Operation :**

- Colored touch-screen HMI + simply button, signified by simply diagram, quantified setting, fulfill digitalization, standardization, humanization perfect requirement.
- CCD registering system adopts colored LCD display + IPC, humanized operation interface, easily setting the related parameters for automatic registration.

● **Safety Protection :**

- Equipped with auto error diagnosis system, safety door, safety restoration, safety raster, emergency stop button, three color warning lamp, etc. comprehensive safety protection.

Option

- Inlet rightward (standard inlet leftward)
- Anti-dust cover
- FFU
- Static eliminator

ATMALINE

IG1515 G5.5

Fully Automatic CCD Registering Opto-electronic Glass Screen Printing Line

Dedicated to fully automatic printing Black Matrix, Icon, IR, Glue mask, etc. for 5.5 generation ITO conductive glass.

- Fully automatic linkage design : fork carrier inlet >> CCD registering >> screen printing >> fork carrier outlet >> steering transfer >> shadow color difference inspection >> IR Dryer
- Utilize servo motor + cylinder transmission to proceed automatic squeegee leveling adjustment, calibration and pressing depth setting.
- Guide rail retractable frame holder device, equip positioning ejector pin, utilizing cylinder positioning block for lead-in point, and use taper principle fixation, repeatability accuracy attains +/- 0.05 μm
- Adopt up / down corresponding CCD registering system, upper registering screen, lower registering edge fiducial of substrate or target, initially complete screen registering, screen movement for automatic registering.

Option

- Automatic ink supply device

(Depth x Width)	ATMALINE IG1515
Table size (mm)	1600 x 1900
Max printing area (mm)	1300 x 1500
Max frame O/D size (mm)	2500 x 2500
Substrate thickness (mm)	0.4 - 1.1
Productivity (non-stop full stroke full speed)	180 P/H
Power source	3Φ, 380V,50/60Hz
Power consumption (kW)	12.8

Vacuum Pad Loading / Folk Unloading

ATMALINE

1016

Light Guided Panel 3/4 Automatic Screen Printing Line

Specialized in precise printing ultra fine line on ITO glass or film

- Connecting suction cup automatic feeding >> screen printer >> fork carrier automatic offloading, attain 3/4 automatic printing function.
- Adopt up-to-date method for Y/Y/X three point micro-adjustment, structural certainty, fast, easy and precise registration.
- Dual servo motor automatic feedback peel-off, automatic calculation and synchronous printing speed, non-sticky mesh, enable to make screen precise compensation.
- Active guide rail retractable frame holder device, gains big room for screen cleaning, facilitate cleaning to save timing.
- Squeegee / flood coater adopt automatic clipping device, facilitate quick mounting / dismantle.
- Removable electrical cabinet in coordinate with spot processing for free movement.

Option

- Dripless squeegee
- Adjustable cleaning roller
- Static eliminator

(Automatic feeder – printer – automatic off-loader) can be collocated freely.

ATMATIC

MF66/F

Fully Automatic CCD Registering Screen Printer (thin film)

Suitable for fully automatic CCD registering screen printing biotech blood sugar tester (silver line, isolation, carbon) and flexible printed circuits (FPC).

- Fully automatic linkage design, automatic suction cup feeding >> CCD registering >> screen printing >> suction cup off-loading >> IR Dryer, attains fully automatic connecting function.
- Servo motor driven, least failure, strong printing torque, full stroke extreme stable speed motion.
- Table top surface is made of thick Aluminum alloyed laminate with hardness anodized treatment, scratching proof, table top flatness accuracy attains +/- 0.05mm.
- Digitalized control, diverse operational function, parameters, quick save and retrieve to achieve purpose of digitalized printing quality.
- Equipped with error diagnosis, safety restoration, emergency stop button, three color warning lamp, etc. comprehensive safety protection.

Option

- Dripless squeegee
- Anti-dust cover
- Cleaning roller
- Static eliminator
- FFU (high efficiency filter)

AT-C1012D / AT-C1216D AT-C1620D / AT-C2030D

- Motor driven stable coating uniform thickness layer
- Frame holding clamp can be moved freely to match various frame size
- Frame locked / released by foot switch controlling for convenient operation
- Single / double sides coating, multiple modes for selection
- Pressure / number of coating front / back side can be set separately
- Memorized 100 groups of parameters

Digital Automatic Emulsion Coating Machine

Specialized in uniform coating emulsion onto screen mesh

(Revision may not be notified if any change)

AT-MIX7V

INK Mixer

Specialized in uniform mixing ink and other additive

- Sealed shaking concept, runs stably
- Rapid ink can holding
- Closed chamber with full safety protection
- Vacuum suction for removal of bubbles

AT-MIX7V (Vacuum model)

Max capacity (kg)	7 (in 1 can)
Machine dimension (mm)	520x730x810
Weight (kg)	125

(Revision may not be notified if any change)

AT-LM4

Stirring Ink Mixer

Specialized in uniform ink mixing and other additive

- Can opened stirring mixing, simple operation
- Three sections clamping to hold the ink can, fast stable
- Stepless speed control for can rotation
- Large and small stirrer can be replaced

AT-LM4

Max capacity (kg)	4 (in 1 can)
Machine dimension (mm)	310x270x400
Weight (kg)	20
