

# CDF<sup>®</sup> Vision Plus

Diazo dual-cure capillary film formulated to resist polishing, fingerprints and curling under humidity extremes

## Product benefits

- humidity resistant
- excellent imaging properties
- solvent resistant
- easy to use
- fast exposure and processing

## CDF® Vision Plus

CDF Vision Plus 18 and CDF Vision Plus 25 are diazo dual-cure capillary films. CDF Vision Plus 18 includes a lot of anti-halation features, and CDF Vision Plus 25 relies on small particle size and enhanced cross-linking in order to provide improved copying properties.

CDF Vision Plus films have very wide exposure latitudes. Their special formulations control mesh penetration and form an enhanced cross-linking "matrix" during exposure, resulting in sharp printing shoulders and mechanical durability. Particulate-size control reduces granularity effects, further enhancing resolution and definition.

Under high humidity conditions, CDF Vision Plus 18 and CDF Vision Plus 25 resist polishing in the roll and fingerprints; and under low humidity conditions, it does not curl. They are compatible with UVs, vinyls, and virtually all solvent-based inks. They are suited to such printing applications as: electronics circuit traces and membrane switches, halftones, CDs and DVDs, ceramic decals, posters, and containers and bottles.

CDF Vision Plus 18 is brown, CDF Vision Plus 25 is violet coloured.

## Properties

**Material:** diazo dual-cure capillary film

**Thickness:** 18 $\mu$  (CDF Vision Plus 18) / 25 $\mu$  (CDF Vision Plus 25)

**Roll lengths:** 10 m

**Roll widths:** 25" (ca. 64 cm), 42" (ca. 107 cm)

**Formats:** available in rolls or custom-cut sheets (no mess, no waste!)
