

# Pigment Inkjet Film HQ

For the production of high quality film templates for screen, flexo, pad and offset printing

## Product benefits

- wet and weep resistant
- fast drying, even with high ink deposits
- high register and line / edge definition
- excellent dimensional stability
- scratch resistant and no bleeding

## Pigment Inkjet Film HQ

Pigment Inkjet Film HQ is dedicated for the production of high quality film templates for screen, flexo, pad and offset printing. The special treatment and colour absorbing layer provide highest density, edge definition and dimensional stability.

Pigment Inkjet Film HQ can be processed with dye and pigment inks.
