

Cleaning agent R 5807

The cleaning agent **R 5807** is used for the cleaning of coating equipment when moisture-crosslinking silicone conformal coatings are processed. It is distinguished by its fast and thorough cleaning properties.

Processing

	Please read this technical report and the publications listed below carefully before using the product. These sheets are enclosed with the first shipment of product or sample.
MSDS	The corresponding material safety data sheet contains detailed information and characteristics on safety precautions, environmental protection, transport, storage, handling and waste disposal.
TI	Technical information TI 15/3 "Protective measures when using chemicals including lacquers, casting compounds, thinners, cleaning agents"

→ Check materials that will be in contact with **R 5807** for their compatibility, such as metal surfaces and gaskets.

Whitish residues may appear. Stainless steel surfaces do not show reactions.

ATTENTION: Do not use this cleaning agent to clean hands. Wear protective gloves and apply hand lotion since all solvents extract the grease from the skin.

Disclaimer

All descriptions and images of our goods and products contained in our technical literature, catalogues, flyers, circular letters, advertisements, price lists, websites, data sheets and brochures, and in particular the information given in this literature are non-binding unless expressly stated otherwise in the Agreement. This shall also include the property rights of third parties if applicable.

The products are exclusively intended for the applications indicated in the corresponding technical data sheets. The advisory service does not exempt you from performing your own assessments, in particular as regards their suitability for the applications intended. The application, use and processing of our products and of the products manufactured by you based on the advice given by our Application Technology Department are beyond our control and thus entirely your responsibility. The sale of our products is effected in accordance with our current terms of sale and delivery.

ATTENTION!

For new products, according to preliminary product information sheets, complete or adequate practical and test results are not always available which would permit a comprehensive assessment of such a product.

It is therefore imperative to exercise particular care in the testing of such products with regard to the application intended!

Any questions?

We would be pleased to offer you advice and assistance in solving your problems. Samples and technical literature are available upon request.
