

Cleaning agent R 5888

The cleaning agent **R 5888** is an aqueous, biodegradable cleaning agent suitable for the reliable removing from carriers of different kinds of conformal coatings, such as **ELPEGUARD®** conformal coatings based on acrylate/polyurethane/epoxy resins. It is distinguished by a high performance when decoated, along with a high user safety.

Density at 20 °C [68 °F]: approx. 1.04 g/cm³

Processing

	Please read this technical report and the publications listed below carefully before using the product. These sheets are enclosed with the first shipment of product or sample.
MSDS	The corresponding material safety data sheet contains detailed information and characteristics on safety precautions, environmental protection, transport, storage, handling and waste disposal.
TI	Technical information TI 15/3 "Protective measures when using chemicals including lacquers, casting compounds, thinners, cleaning agents"

Supplied as a concentrate, the cleaning agent **R 5888** is thinned, prior to its application, with demineralised water to a concentration of between 10 and 25 %. It can be applied by spraying, dipping or in an ultrasonic bath, either at room temperature or another temperature of up to 60 °C [140 °F], and with mechanic aid if necessary. After cleaning, the carriers are rinsed with tap water and dried.

The best result is achieved in an ultrasonic bath, based on a concentration of 25 % and a temperature of 60 °C [140 °F].

Check all materials which will be in contact with the cleaning agent **R 5888**, such as sealings, for their compatibility.

Disclaimer

All descriptions and images of our goods and products contained in our technical literature, catalogues, flyers, circular letters, advertisements, price lists, websites, data sheets and brochures, and in particular the information given in this literature are non-binding unless expressly stated otherwise in the Agreement. This shall also include the property rights of third parties if applicable.

The products are exclusively intended for the applications indicated in the corresponding technical data sheets. The advisory service does not exempt you from performing your own assessments, in particular as regards their suitability for the applications intended. The application, use and processing of our products and of the products manufactured by you based on the advice given by our Application Technology Department are beyond our control and thus entirely your responsibility. The sale of our products is effected in accordance with our current terms of sale and delivery.

ATTENTION! For new products, according to preliminary product information sheets, complete or adequate practical and test results are not always available which would permit a comprehensive assessment of such a product. It is therefore imperative to exercise particular care in the testing of such products with regard to the application intended!

Any questions? We would be pleased to offer you advice and assistance in solving your problems. Samples and technical literature are available upon request.
